Education

ENSAE Paris <i>Engineering Curriculum: Data Science, Statistics and Learning. GPA: 3.8</i>	2021-2025
Institut Polytechnique de Paris <i>Masters 2 Data Science</i>	2024-2025

Work Experience

Research Intern | [Sony R&D](#) | [Letter of recommendation](#) Stuttgart, January 2024 - June 2024

- * Conducting experiments to understand and benchmark the impact of uncontrolled environments and the properties of images on 3D reconstruction out of 2D images.
- * Created a fully automatic pipeline from image preprocessing, to 3D object reconstruction, and automatic mesh processing for evaluation purposes.
- * Deployed a webapp to visualize and automate mesh alignment and comparison tasks

Supervised by [Faciús, Z](#) and [Francheschi, R](#)

Research Intern | [Inria - SIMBIOTX](#) | *Pytorch, 3D, Image processing, Segmentation* Paris, May 2023 - November 2023

- * Implemented and benchmarked the impact of Topology preserving losses on improving accurate 3D liver vessel segmentation and connectedness.
- * Developed an image processing algorithm to transform single label vessel datasets into two-label datasets separating the portal and hepatic trees.
- * Conducted a comprehensive statistical analysis of the morphometry of the obtained vessel trees while training a network to recognize perfusion volumes of the vessels. Wrote and submitted my first paper to MICCAI 2024 accepted to ADSMI workshop.

Supervised by [Ali, O](#) and [Vignon-Clementel, I.](#)

Data Science Intern | [Cour Des Comptes](#) | *R, Sphinx* Paris, June 2022 - September 2022

- * Conducted comprehensive data analysis on R, utilizing cartography and descriptive statistics techniques to create an overview of the French Airport Network.

Supervised by [Grignon, P](#)

Skills

Programming: Python (PyTorch, Scikit learn/image, Selenium, pandas, Numpy, matplotlib), Git, Slurm, Linux. learning C++, Godot and a bit of JS/CSS

Projects

- Paper reimplementing "Unsupervised Multi Modal Translation". Recipe generator and supermarket recommender according to fridge inventory, spatial proximity to supermarkets and diet, Time series forecasting, Monte Carlo simulations of the Lotka-Volterra model.
- Swarm intelligence search and rescue competition to experiment with multi agent reinforcement learning and trying to apply it to a personal game development project

Clubs

ENSAE English Debating Team | *2022-2023*
[Winners](#) of the 2023 Grandes Ecoles [FDA](#) Tournament

IP Paris Racing Team | *2023-present*
I joined the **Driverless** team to deepen my skills in computer vision and model deployment.
